-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to *Counting, scheduling, or event timing. The subject matter wherein counting is performed, an event is timed, or operation is scheduled using a generated interval*, classified in class 713, subclass 502.
 - II. Claims 18-41, drawn to the *authentication of an entity and a message. The subject matter wherein a transmission or reception entity and a corresponding message are determined to be genuine*, classified in class 713, subclass 170.
2. The invention of group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case invention [I] has separate utility such as watchdog timer which monitor input and compare with abnormality determining times or preventing clock drifting in a system by periodically checking for the last update time. In the instant case invention [II] has separate utility such as electronic communication includes digital signature, or encryption, encoding etc.. to insure that the messages are authentic. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr. Klutsch on May 5 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
